

Parts Services

Metso LongLife Hammerpin

Reduce your hammerpin costs by up to 30%

Metso is continuously working to find better solutions for the customers, also when it comes to spare parts and new materials. The latest spare part improvement is the **Metso LongLife Hammerpin** as alternative to our standard hammerpin, offering an increased life-time with a very competitive price. The results from real-life cases show that the life-time of the **Metso LongLife Hammerpin** is from 40% and even up to 60% longer than standard hammerpins. The life-time cost of the **Metso LongLife Hammerpin** has proven to be lower than the standard one.

Spare parts from OEM are the best fit for your machine

When you rely on parts supplied by the Original Equipment, you can be sure that the parts have been designed to be the best for your machine, fulfilling, or as in this case exceeding, the standards set in the original machine delivery.

The standard hammerpin shows significant wear after 50,000 production tons.

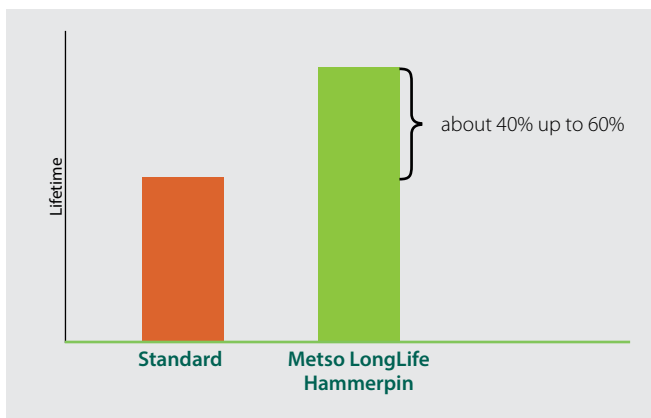

Metso LongLife Hammerpin's wear after 50,000 production tons is considerably less.

Hammerpin wear

	Standard hammerpin	Metso LongLife Hammerpin
Wear, rotor-sides	> 25 mm	< 15 mm
Wear, rotor-center	> 15 mm	< 8 mm
Curvature	slight curvature	slight curvature
Wearing down	complete	60%
Result	change	reassembly
Lifetime	100%	(estimated) 140-160%

Extended life-time and lower life-time costs with Metso LongLife Hammerpin

The Metso LongLife Hammerpin is suitable for all shredder brands!

Beside our own Lindemann and Texas Shredder brands, we supply Metso LongLife Hammerpins even for any other metall shredder brand.

Please contact us for a detailed quotation.

Customer comment after five months trial on a shredder ZZ 210 x 260, 2000 hp with mixed scrap:

"The new Metso LongLife Hammerpins are two to three times as robust as the other hammerpins in the market. We do not want the old hammerpins again!"
